FAQs

Fuel Insights, powered by VPS

Recognising the need to manage risk and reduce claims in one of the most challenging areas of ship management – fuel quality – we've partnered with VPS, a leader in marine fuel testing and inspection services, to launch Fuel Insights. The latest resource in our Get SET! portfolio, our Fuel Insights platform is powered by VPS to provide actionable insights based on live VPS data, including fuel off-specs, calorific value, and density differences in all major bunkering ports.

By offering real-time fuel quality statistics through an interactive, user-friendly dashboard, Fuel Insights helps users anticipate risks and select the best-priced fuels with the lowest environmental footprint for fully informed fuel procurement decisions.

By choosing Fuel Insights, powered by VPS, shipowners and operators can accurately monitor, report, and reduce their fleet's emissions while improving operational performance and mitigating risk.

Q What is Fuel Insights, powered by VPS?

A Fuel Insights, powered by VPS, is a marine fuel quality platform that provides actionable insights based on proprietary live data from VPS on fuel off-specs, calorific value and density differences in all major bunkering ports. Fuel Insights enables our users to better anticipate risks associated with fuel quality and select the fuels that offer the best pricing with the lowest environmental footprint.

Q How does the platform work?

A By choosing Fuel Insights, powered by VPS, shipowners and operators can accurately monitor, report and reduce their fleet's emissions, while improving operational performance and mitigating risk.

Q How much does it cost to use?

A Fuel Insights, powered by VPS is free to use for all NorthStandard members.

Q Who can use Fuel Insights, powered by VPS?

A All NorthStandard members can access Fuel Insights, powered by VPS, through their NorthStandard account.

Q Do I need to download an app or special software?

A No, simply launch Fuel Insights, powered by VPS, through your usual internet browser. You will need a NorthStandard account to get access.
