

Jordan Maritime Commission

No.: 1/6/6/2400

Date: 11/09/2023

Ref.:

Jordan Shipping Association

Based on the laws and instructions of the Aqaba Special Economic Zone Authority (ASEZA) to prevent marine pollution with any harmful substances and the reception of waste water resulting from the ship.

Please note that it is strictly prohibited for ships calling the port of Aqaba to use the (open loop) for Exhaust Gas Cleaning System(EGCS).

If the ship has to use the Exhaust Gas Cleaning System(EGCS) , only the closed loop is accepted and all the discharged waste water is retained in the ship holding tank.

In case the ship only uses the open loop system then it must change over the fuel system from High Sulphur to the low Sulphur.

Acting Director General

Engineer Mohammad Al Ashaal

M. Al Ashaal
