Subject: Information on the "Exhaust Gas Scrubber" and the
"Discharge outlet water overboard" operation

Mr. Director of Operations,

Further **to** your letter dated July 29 2020 requesting information on the Open Loop Scrubber operation,

I have the honour to inform you that these types of operations require a prior inspection of the entire ship gas emission system and the water separation system
Of the International Convention on 1973 the Prevention of Pollution from Ships
of Ship Pollution and its Annexes as amended.

As the Togolese maritime administration does not have any means of control at the moment, these operations are therefore not authorised.

Yours sincerely

Matchonnawe BAKAI
